VV_CERAMICS – CERAMIC JEWELLERY CARE CARD

Your Ceramic Piece

Your piece is handmade and unique. Small variations in colour, texture, shape and glaze are part of the making process.

Ceramic is hard but brittle. Avoid strong impacts, dropping the piece or putting pressure on it, as this can cause chips or breakage.

For rings: ceramic rings cannot be resized, so please handle them with particular care.

Remove your jewelry during activities where it may be exposed to impact, pressure or mechanical stress.

With proper care, your ceramic piece can be enjoyed for many years.
